Complete & Flexible Solution for Your Commercial Space

HOTEL APPLIANCES

UNISEC—Offer security and comfort for the guest

Uni-Sec's hotel safes fulfil all the requirements that need to be considered when selecting a hotel safe—they are operated intuitively, so your guest will not require an instruction before using them. The safes require no maintenance by hotel staff apart from when the batteries run out.

Uni-Sec's hotel safes are available in many sizes and with a large variety of features and fittings. Safes can be supplied with various locking systems suited to any type of business, from a classic room safe for cupboard or cabinet installation to a top-opening safe for space-saving installation in a drawer. All models are easy to be operated with reliable quality and noiseless.

» UNI-SEC SERVICE UNIT

The Uni-Sec's service unit combined the function of emergency power, opening and audit trail.
Up to 1000pcs record can be stored for each unit.

With the software provided from us, the audit trail can be read to the PC with room no.

The software will show the opening and closing records with the way and date. Meanwhile all the records can be printed out from the software.

Features of Absorption Minibar

- No compressor, no noise, suitable for quiet place such as hotels and hospitals
- No freon, no need to add refrigerants, environmental friendly
- No mechanical movement in cooling parts, long life
- Overhead lighting design; adjustable left/right door and shelves
- Using electronic thermostat & IC chip control, auto defrost once a day without artificial defrost troubles
- With a special energy-saving function: using a precise time cycle system to control load operation, saving 17 % power consumption per day
- All structure use imported materials, easy repair and maintenance

56 db low noise design with soft wind speed

110,000 RPM high-speed motor, wind speed can reach 22 meters per minute, which is three times than traditional hair dryer

200 million

200 million units of negative ions can prevent the accumulation of static electricity caused by hair deformation and bending, thus protecting the hair

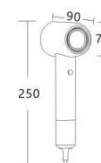

Specially designed for hotel use, double layer wear-resistant paint coating

Three wind speeds, four temperature options, a total of 12 options, real-time screen display

Built-in NTC temperature sensor, high-frequency self-test, 100 times per second, precise control of air flow and temperature, prevent overheating damage to hair

Product Type: Hair Dryer
Product Model: KH790
Power: 1500W
Motor speed: 105000Rpm
Maximum wind speed: $\geq 21\text{m/s}$

Double wall structure: inner bins and shell made from ABS

Seamless design: there is no gap between the trash can ring and the trash can body, simple and easy to clean

After the garbage bag is put in, it cannot be seen from the appearance

Compartment garbage can: removable compartments help sort general garbage and recyclable garbage easily

The plastic part of trash bin can be made from flame retardant materials

若迷你吧被放在柜内使用时, 必须有合理良好的通风, 以便热量的蒸发。建议迷你吧两侧至少保留5-10CM的间隙, 后面至少保留10-20CM的间隙。柜内通风设计可参照如下:

Installation principle: if place to cabinet use, must keep reasonable air circulation for the heat dissipation. It is suggested that the refrigerator should be retained at least the 5-10cm gap, The design of ventilation in the cabinet can be referenced as follows:

SLIDING HINGE
联动装置

小冰箱可与家具相配套, 发泡门冰箱门体 (门体带玻璃的除外) 可与柜子门体相连接, 可以达到打开柜子门的时候同时打开冰箱门, 使客人拿取食物更方便。

Sliding hinge: minibar can be matched with furniture, foamed door body (except the door body with glass) can be connected with the cabinet door, allowing the simultaneous opening of both minibar and cabinet so that the guests Can take food more convenient.
